

# Bioinformatics Matters: more than a cause, an action!

Rita F. Belo<sup>1</sup>, Marta Bica<sup>1</sup>, Rita M. Silva<sup>1</sup>, Arthur Scheider<sup>1</sup>, Nuno Barbosa-Morais<sup>1</sup>

<sup>1</sup>Instituto de Medicina Molecular (iMM) João Lobo Antunes, Faculdade de Medicina da Universidade de Lisboa, Lisboa (Portugal)

## Bioinformatics MATTERS

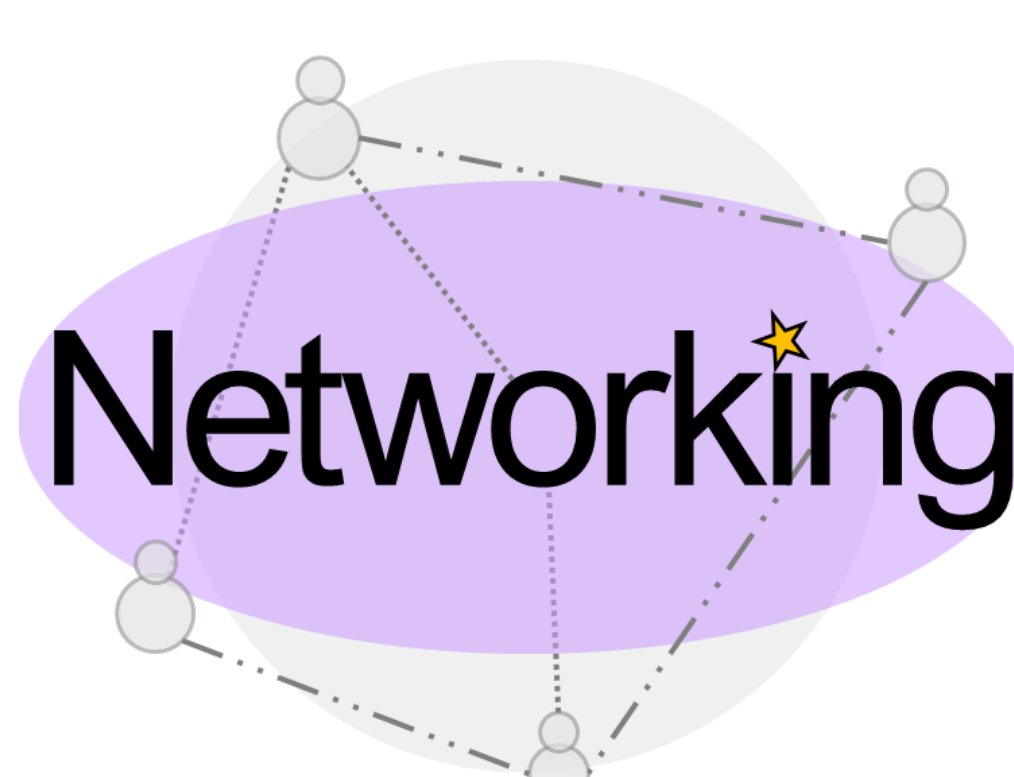

is a research community founded due to the need of gathering all researchers at iMM with an interest, planning to work or working in Bioinformatics and/or Computational Biology-related fields.

*Our aim is to make bioinformatics knowledge available to all!*

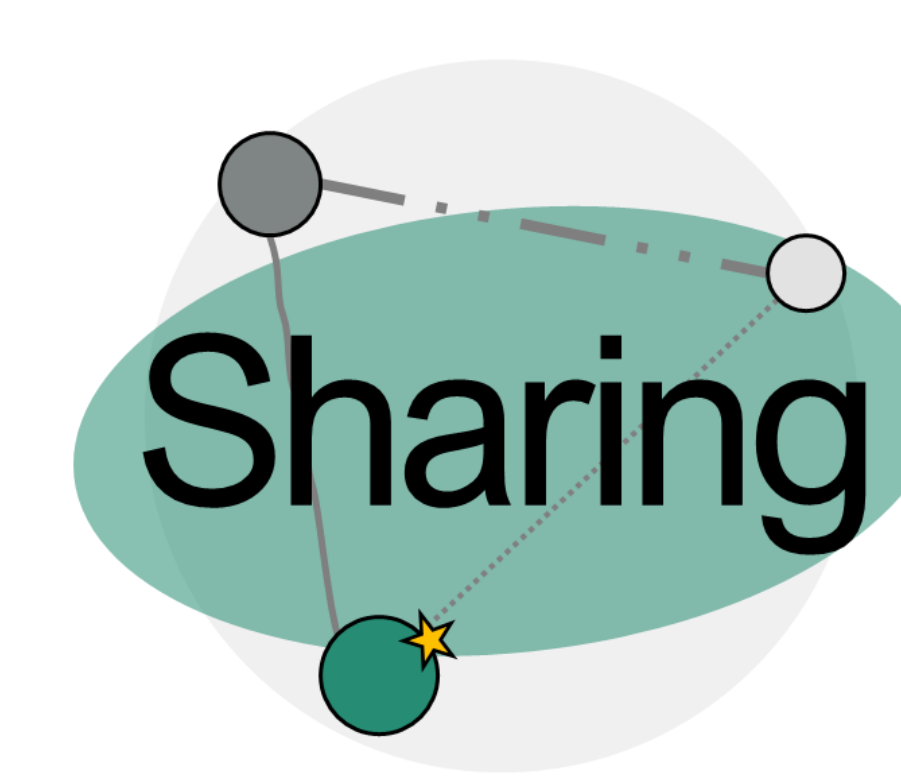

We focus on areas that are vital for this concept:

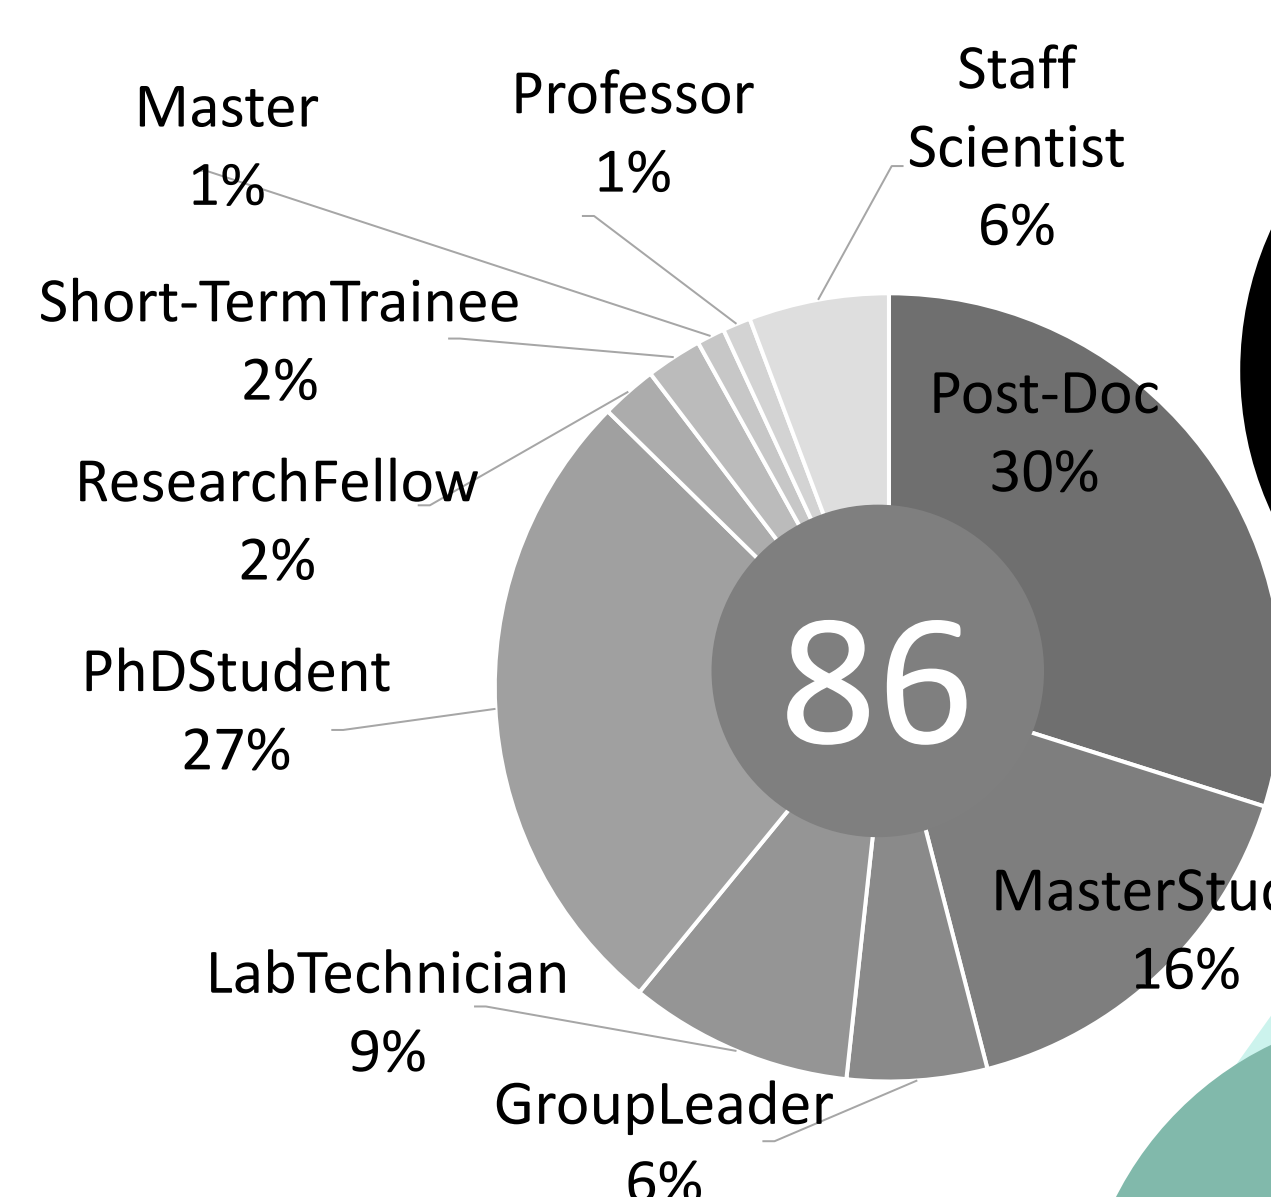

By providing tutorials and training video designed for non-experts researchers

Encouraging networking activities, such as iMM's Computational Biology and Bioinformatics Seminars

Support the active sharing of bioinformatics resources developed by iMMers (e.g. Dashboards, R packages)

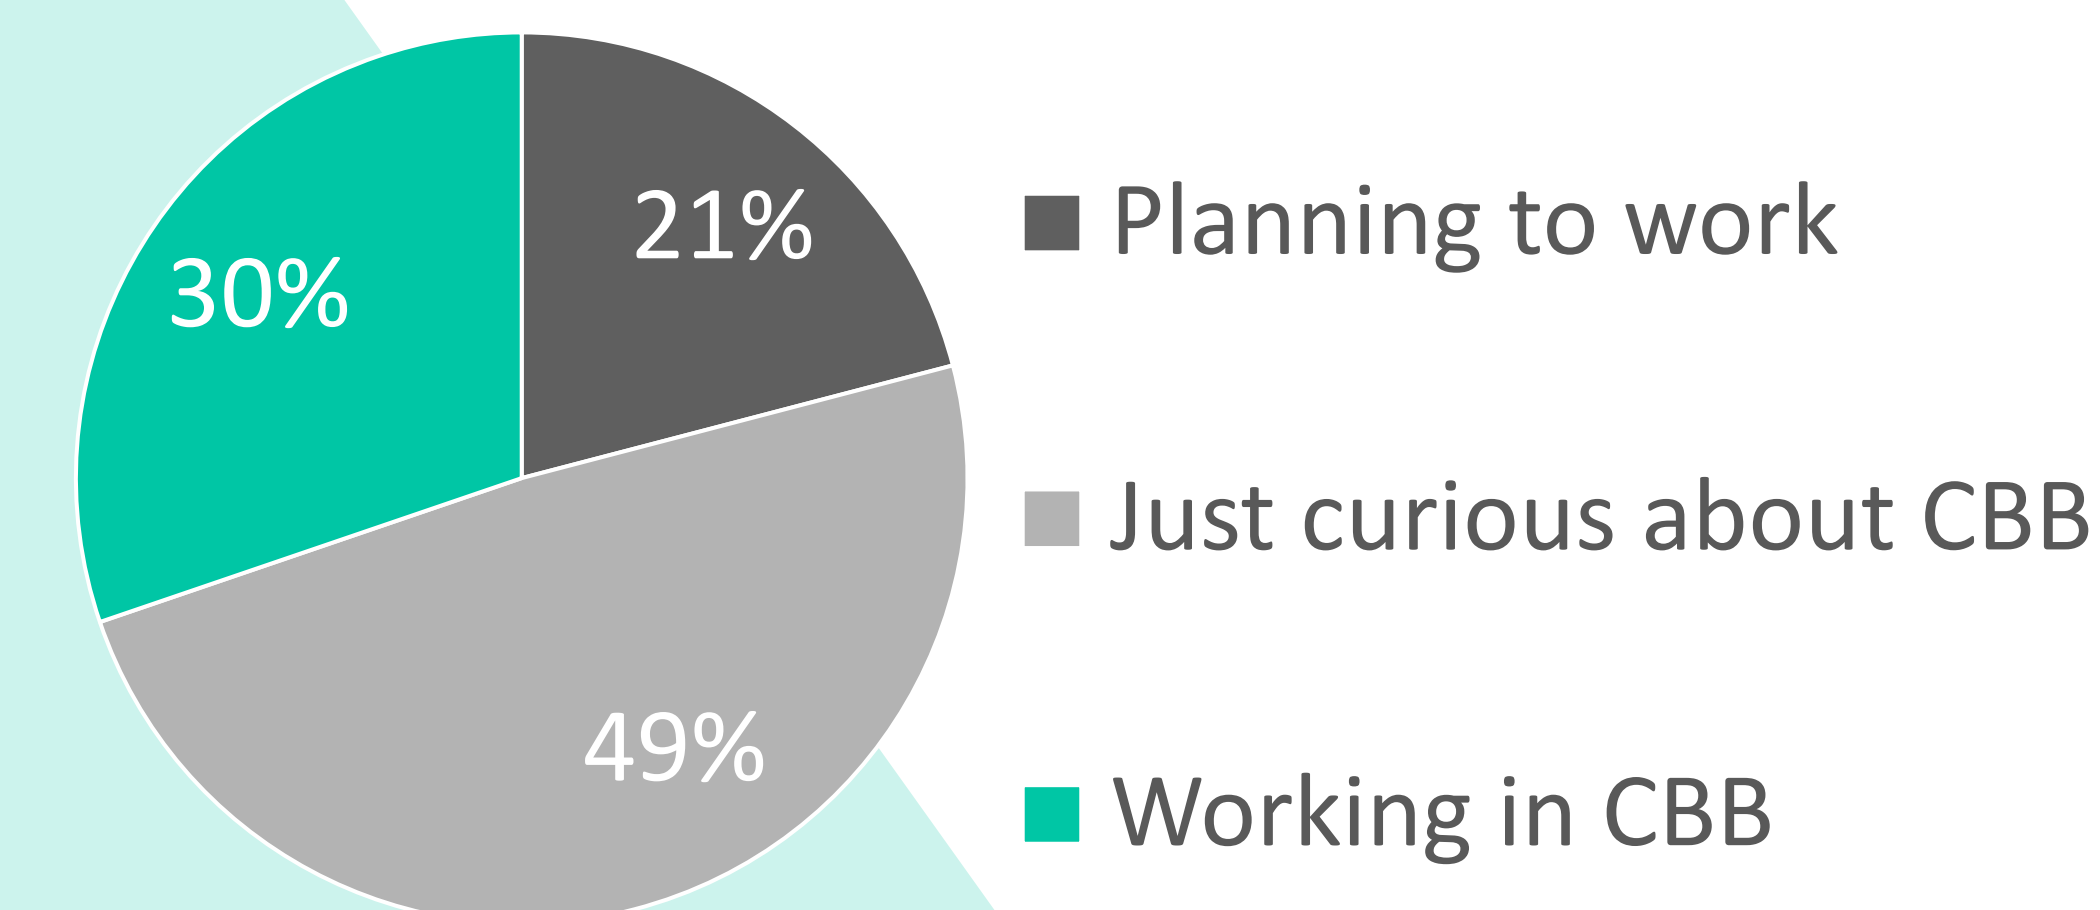

7 Short-Talks

15 Pich-talks

Discussion Forum

CBB at iMM

Landscape of Participants

We developed an iMM's institutional wiki page to centralize all information and make it easily accessible to the community (scan the QR code for more).
